For Immediate Release

Follow-On Information associated with JudgeX.org and related websites on Warren Mosler and MMT 10ctober2024

WarrenMosler.co: A man who commits felonies for breakfast is shadow-controlling our money, and becoming fabulously wealthy (insider trading) from promoting it to Federal Reserves around the world. We cry at Publix.

ModernMonetaryTheory-Scam.com: A town of 100 people each earn \$100 per day and each need to buy 2 eggs per day for nutrition. Their housing/utilities/car/gas costs are \$96/day: thus each person has \$4 left over to buy food every day. 4*100 = DD400 ("Four Hundred Demand Dollars").

There are 200 eggs output from chickens every day, and **DD**400 "fighting" to acquire the 200 eggs. Thus each egg will be sold for \$2. At the end of each day there is **DD**0 left.

Outside of town, there are 10 Nobility (kings / queens /etc) who each earn \$1000 per day. The Nobility want to earn more money, thus they want to pay the 'people' less for their labor. <u>SOLUTION</u>: Bribe queen-Kamala, the border czar, to print more money and offer it to illegal migrants (\$70/day) who are willing to work for \$30 per day (plus the \$70/day of printed money).

The \$70/day of printed money PER ILLEGAL MIGRANT winds up in the wallets of the Nobility, because their labor costs just went down by \$70/employee PLUS selling costs are higher because of the Money-Printing Inflation. Thus, the Nobility get richer on both ends: pay illegals-level wages & sell for inflated prices.

The American people (now called "Peasants" by the Nobility) see prices for eggs go up, and the Nobility tells them this is normal economics...no one really explains WHY:

- 1) Prices are going up eggs now cost \$3 each (in this explanatory simulation see below)
- 2) The Peasants have to accept lower wages or part-time work; income is down to \$90/day
 - 1 JUDGEX.ORG RELEASE FOLLOW-ON INFORMATION 10CTOBER2024

- 3) The Nobility are flying around in private jets and crashing supercars, while trying to convince the Peasants to eat bugs to save the environment from cow farts.
- 4) ...and the Nobility are raping an increasing number of little Peasant girls until the little girls are old enough to be live-harvested for their organs.

...this is why prices for eggs are going up so fast; humbly presented by a man with an MBA from Yale who earned 'Distinction' (top 3%) in both Economics and Game Theory. For validation, call the Yale School of Management > James "Todd" Wagner class of 2000.

INITIAL CONDITION: 100 people with **DD**400 available to buy the 200 eggs: $P_{egg} = DD$ 400/200 eggs = \$2/egg

KAMALA CONDITION: 130 people (100 Peasants with **DD**300 and 30 illegal migrants with **DD**300):

 $P_{K-egg} = (DD300+DD300)/200eggs = $3/egg$

***Important note on the benefits for the noblemen who have funded/bribed Kamala to bring in the workers and little girls: because MONEY PRINTING (handed out to illegal migrants) pays for a comfortable lifestyle for them, they are willing to work for even less money > Now you can see how the printed money's ENDPOINT is the pockets of the cabal of evil men behind Kamala.

"It's easy, you don't even have to physically print the money. Just change numbers on a spreadsheet."

- Warren Mosler

Kamala; female frontman.

It was genius to choose a female frontman to disguise the evil men's intent to drive us into peasanthood.

BENEFITS FOR THE NOBLEMEN whom Kamala provides with cheap labor and little girls:

PROFITS up by over 50% via prices being 50% higher and input costs (wages) going down.

PLEASURES no need to go offshore to rape little girls; they are available everywhere.

POWER is becoming absolute, and will yield a new "Dark Age" [last Dark Age was 500 years] if Taylor Swift gets her way.

JudgeX.org: Many of us have seen where [obvious] corruption/bribery has occurred, but it is amorphous and difficult to prove. The men and women in power who are taking bribes HAVE MADE YOU BELIEVE THAT YOU CAN'T PROVE IT UNLESS YOU VIDEOTAPE THEM ACCEPTING A CHECK WITH "BRIBE" IN THE MEMO FIELD. Evil men, Men Like Mosler, created their own seemingly-impenetrable disguise; and we let them do it.

JudgeX is fundamentally simple and uses a methodology that has been battle-tested in several other industries already. It is my hope that someone (Elon Musk) integrates it into AI so it is easily accessible to everyone effortlessly.

I am committed to earning exactly \$0 from all of the websites and actions described in this document. Karma is enough for me; I am blessed with enough already.

JudgeX will output one or two different VISUAL proofs that bribery either did (or didn't) occur.

- 1. A graphical representation of the EXTERNAL OUTPUT of the "system" being evaluated. Importantly, there is no need whatsoever to look [inside] the system, such as looking inside the system's financial records, phone records, or anything like that. The analogy I used in my interview with Lance Shuttler was "It's like a helicopter mom tracking the output [poop] of her newborn baby. Gross as that is, the mom can identify when something INSIDE THE SYSTEM has gone haywire simply by statistically tracking the Poo-Output. If a Judge suddenly outputs a **quadruple quarter-pounder of poo** (when all his other cases' outputs were normal); you graphically know he took a bribe."
 - a. This JudgeX output is a GRAPH. This is more challenging to assemble, and AI would help.
 - b. Systems that produce **QUALITY** have one thing in common: **CONSISTENCY**. Sudden INTENTIONAL INCONSISTENCY indicates what is commonly called "Out-Of-Control" in Statistical Process Control.
- 2. A singular number indicating the number of years between "natural" events equivalent to the Judge's OUTPUT. As in #1, there is <u>no need whatsoever</u> to have access to the Judge's financial/phone/email records...that is the magic of JudgeX. Everything you need is relatively-easy (and legal) to access.
 - a. <u>Analogy</u>: using *JudgeX* (standard math/statistics) for determining how many years it would take to roll "snake eyes" [two die each showing 1] twenty-two times. Odds of one snake-eyes roll is 1/36.
 - i. The odds of 22 snake-eyes rolls in a row is (1/36)*(
 - ii. Another way to calculate this shorthand: odds are 1 in 36^{22} [1 / 36^{22}]

- iii. Assume it takes 5 seconds to make a single roll (a "reasonable" assumption); thus it takes 110 seconds to make the series of 22 rolls. There are 3600 seconds in an hour. There are 31,557,600 seconds in a 365.25 day long year.
- iv. If you didn't sleep and didn't eat; you could make 31,577,600 / 110 = 286,887.3 roll-sets per year.
- v. **PUNCHLINE:** You know the odds of Event-X and you know how many opportunities that Event-X could "naturally" occur in a year; so let's calculate number of years between a "natural" occurrence of rolling snake-eyes 22 times in a row: 60,387,000,000,000,000,000,000,000,000 years
- Dice Rolling vs Dice PLACING: Instead of waiting 60 bazillion years for the 22 consecutive 'snake-eyes' rolls, if you wanted to CHEAT (Bribe the Judge). You could simply place each die with the 'one' facing up. Then pick up the die and place each die with the 'one' facing up. Repeat 20 more times....so then claim you "rolled" snake eyes 22 times in a row, but it only took you 2 minutes instead of [forever].
 - b. In the Judge Luis Delgado instance, his 22-claims of "no evidence nor inference inside of 3000 pages of evidence" yields a gargantuan span of time between this happening 'naturally' 37,000,000,000 years: more than double the lifespan of the Universe....and this is with assumptions that give enormous 'benefits of the doubt' to Judge Luis Delgado.
 - i. 'Natural' occurrence is the fact that nearly everything CAN happen (great example is Asteroids do hit the Earth, but it happens only about once every 100,000,000 years).
 - ii. Judges are successfully bribed numerous times a day every day around the world.
 - iii. Only Lawyers [some are scumbag lawyers] are allowed to be Judges.
 - c. This JudgeX output is a singular NUMBER. A simple number that will make it immediately obvious if the system [the Judge] is operating in an "In Control" honest & quality manner or an "Out-Of-Control" bribed & unjust manner.

This is yours. I pray that you bravely use this tool to shift the balance of power back to the peasants.

I identify as a peasant (\circ)
